

## KRYSTAL™ DMS: IBM Informix Integration

**Krystal™ DMS** can be configured with Relational Database Management System (RDBMS) such as IBM Informix, IBM DB2 UDB, ORACLE 8.x, and Microsoft SQL SERVER 2000 etc.

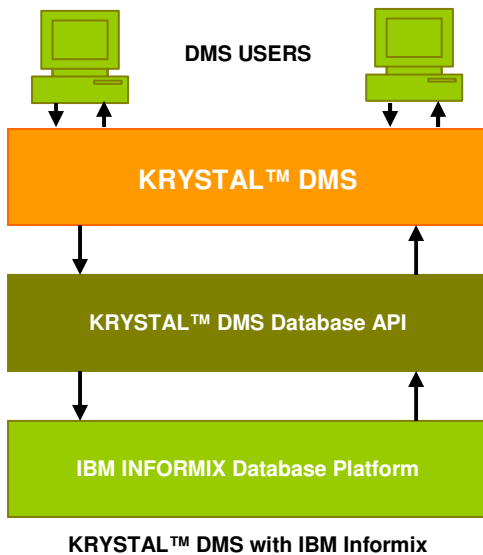

IBM Informix® Dynamic Server (IDS) is an exceptional online transaction processing (OLTP) database that offers outstanding performance, reliability, scalability and manageability for enterprise and workgroup computing.

With a full-featured relational database management system (RDBMS) platform, IDS offers extensive capabilities to meet unique business requirements with the speed of native database functions. In addition, IDS delivers:

- Solid, secure and reliable support for on demand environments
- Enhanced performance, availability, and database administrator and programmer productivity
- Reduced deployment and management costs
- High security for compliance with government regulations

To leverage the power, flexibility, extensibility and robustness of the Informix database system, Primeleaf Consulting [P] Ltd decided to integrate with its **KRYSTAL™ DMS** Enterprise Edition.

Many organizations across the world have already invested in IBM Informix Dynamic Server and database servers, to leverage the existing infrastructure and cost, Primeleaf started integrating and enabling its **KRYSTAL™ DMS** suite of products with IBM Informix database software.

**KRYSTAL™ DMS** is easy to use, powerful and cost-effective document management software that allows companies to centralize the management, storage, retrieval and distribution of documents.

Built with robust, scalable architecture, **KRYSTAL™ DMS** can be deployed over LAN, WAN or Internet in large Enterprises. These Products also empower individuals and organizations by acting as powerful knowledge management tools.

**KRYSTAL™ DMS** addresses the needs of many vertical markets, including manufacturing, architecture, engineering, construction, utilities, universities, and government agencies.
